ABSTRACT

Data on earned degrees conferred in the United States are presented. The data cover the period July 1, 1976 through June 30, 1977 and were collected from the survey instrument, "Degrees and Other Formal Awards Conferred," from the 12th annual Higher Education General Information Survey. Data on baccalaureate and higher degrees are presented in summary and detailed tables that show the numbers of degrees granted by level of degree, institutional control and level, sex of recipient, state, and discipline division and specialty. Information is presented on the purpose of the survey, the survey organization and methodology, and on trends from 1966-77 to 1976-77. A sample survey form is included. (SW)

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report fuli and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

Data on earned degrees conferred in the United States—a widely used measure of output of higher education for a specific academic year—are presented in this publication. The data are collected from one survey instrument ("Degrees and Other Formal Awards Conferred," covering the period July 1, 1976, through June 30, 1977) from the 12th annual Higher Education General Information Survey (HEGIS) conducted by the National Center for Education Statistics (NCES).

Data on baccalaureate and higher degrees are presented in summary and detailed tables, which show the numbers of degrees granted by level of degree, institutional control and level, sex of recipient, State, and discipline division and specialty. Awards below the baccalaureate level are soon to be published in a separate report, *Associate Degrees and Other Formal Awards Below the Baccalaureate, 1975-76, and 1976-77, Summary Data.*

Cooperation of college and university officials made possible a response rate of 99.9 percent for all institutional units operating at the time of the survey. Data for two institutions had to be imputed. One institution had closed and the other institution did not provide the data.

The continued efforts and interest of the survey respondents and the State coordinators are deeply appreciated.

Paul F. Mertins, Acting Chief
University and College Surveys
and Studies Branch

Rolf M. Wulfsberg, Acting Director
Division of Postsecondary and
Vocational Education Statistics

March 1979

Acknowledgments

Reports based on various portions of the Higher Education General Information Survey (HEGIS) were made possible by the cooperative endeavors of many individuals in the National Center for Education Statistics (NCES). For the present report, the following individuals made contributions of particular note:

Agnes Q. Wells gave much valuable advice and assistance; Algenia S. Williams typed the material into a readable manuscript.

Highlights

1. The total number of bachelor's and higher degrees conferred in 1976-77 (1,344,493), was a slight decrease from the previous year's total (1,344,581). The relative changes, by level of degree and by sex, from 1975-76 to 1976-77 were:

Level of degree	Percent change	
	Men	Women
All levels	−1.4	1.8
Bachelor's	−1.9	0.8
First-professional	−1.0	23.0
Master's	0.3	3.3
Doctor's	−4.3	3.7

Women showed increases at all levels—the largest (23.0 percent) was for first-professional degrees. The only increase for men (0.3 percent) occurred at the master's degree level. Women showed a 3.3 percent increase at the same level.

2. The percent of bachelor's and higher degrees awarded to women continued to increase within each level of degree with the exception of bachelor's degrees which remained the same:

Level of degree	Women as a percent of total bachelor's and higher degrees	
	1975-76	1976-77
All levels	44	45
Bachelor's	46	46
First-professional	16	19
Master's	46	47
Doctor's	23	24

3. The percent of bachelor's and higher degrees conferred by *publicly* controlled institutional units remained the same at each degree level; however, the percent of change for "all levels" showed a decrease of one percentage point, as a result of rounding.

Level of degree	*Publicly* controlled as percent of total bachelor's and higher degrees	
	1975-76	1976-77
All levels	67	66
Bachelor's	69	69
First-professional	41	41
Master's	66	66
Doctor's	64	64

4. The three disciplines with the largest number of bachelor's degrees awarded in 1976-77 remained unchanged. However, positional changes involved business and management replacing education in first place; social sciences remained third.

Discipline division	Number	Percent of total bachelor's degrees
Business and management	153,762	17
Education	145,398	16
Social sciences	118,322	13

5. As in previous years, the three discipline divisions with the largest number of master's degrees conferred in 1976-77 remained the same:

Discipline division	Number	Percent of total master's degrees
Education	126,730	40
Business and management	46,650	15
Public affairs and services	19,696	6

6. The three discipline divisions with the largest number of doctor's degrees in 1976-77 showed a change from previous years—biological sciences replaced physical sciences as the third highest. They were:

Discipline division	Number	Percent of total doctor's degrees
Education	7,955	24
Social sciences	3,784	11
Biological sciences	3,403	10

7. In reference to specialties within the discipline divisions, by level of degree, the largest numbers of degrees were in:

Level of degree and discipline specialty	Number	Percent of total within each level
Bachelor's—elementary education, general	53,835	6
First-professional—law	34,363	53
Master's—business management and administration	23,946	8
Doctor's—psychology, general	2,116	6

Purpose Of The Survey

Earned Degrees Conferred presents the distribution of all degrees (except honorary) granted by all institutions in the aggregate United States identified as degree granting by the *Education Directory, Colleges and Universities,* for a specific academic year. Primarily, this information provides a means for reporting the trained manpower pool in discipline specialties, by degree level and sex, and for ten selected professions. Beyond this, the data fulfill several needs of various State and Federal legislative and executive agencies. Other groups that find this information valuable include discipline-oriented professional associations. accrediting bodies, government agencies that fund specific disciplines, researchers and planners in postsecondary education, and employers.

This edition of *Earned Degrees Conferred* represents the 12th year in the HEGIS survey series and is the 7th report to use the taxonomy adopted in 1970-71 for the 6th HEGIS. Thus, all data for the survey years 1970-71 through 1976-77 are directly comparable and applicable to studies of (1) trends in the number of degrees granted in the discipline divisions and specialties, (2) distributions by sex, State, or other area, and (3) distributions by institutional control and level.

Survey Organization And Methodology

Degree Definitions

The survey requests data for higher education degrees which are defined as follows:

Bachelor's—requires successful completion of at least 4 but not more than 5 years of academic work beyond high school. Includes degrees conferred in cooperative work-study plans which provide for alternate class attendance and employment in business, industry, or government.

Master's—requires successful completion of at least 1 year and sometimes 2 years of work beyond the bachelor's degree. Includes the degree of Education Specialist.

Doctor's—includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and Ph.D. degrees in any field.

Other Degree or Certificate—requires completion of a program intermediate between the master's and doctor's degrees which is recognized by the awarding of a degree or certificate.

First-Professional Degree—a degree that (a) signifies completion of the academic requirements to begin practice in the profession, (b) is based on a program which requires at least 2 years of college work prior to entrance, and (c) requires a total of at least 6 academic years of college work, including prior required college work plus the length of the professional curriculum.

Survey Universe

This report is based on data furnished by 1,864 institutional units. These constitute all of the institutional units in the National Center for Education Statistics' universe that could be identified as

offering bachelor's or higher degrees during the period July 1, 1976 to June 30, 1977. The survey universe is based on the list of institutional units included in the *Education Directory, Colleges and Universities, 1975-76* (Publication No. NCES 76-130) with such changes as were known to NCES in fall 1977. Table A shows the number of institutional units included in this survey, by control and level.

Table A.--Number of institutional units included in the 1976-77 survey of earned degrees, by control and level

Level of institutional unit	Total	Control	
		Public	Private
All institutional units	1,864	557	1,307
Universities	161	96	65
Other 4-year	1,703	461	1,242

In addition to these 1,864 institutional units that granted degrees, there were 50 other units that, although offering instruction at the bachelor's or higher levels, did not grant degrees. Some were undergraduate institutions that did not confer bachelor's degrees, but gave diplomas, certificates of completion, or similar awards; others were graduate institutions that did not confer graduate degrees (in some instances, such degrees were conferred by cooperating institutions).

Major Classifications Of Data

Type of Control—Institutional units were identified as "public" or "private" according to their classification in the *Education Directory.*

Level of Institutions—Selected tables in the report group institutional units into two categories: "universities" and "other 4-year institutions." Classified as universities are units that give considerable stress to graduate instruction, confer advanced as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other units offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" category.

Discipline Divisions and Specialties (major fields of study)—The classification of discipline divisions and specialties relies on *A Taxonomy of Instructional Programs in Higher Education.** This was adopted by HEGIS in 1970 and is maintained to provide comparability of data on a continuing basis.

Data Collection

A copy of the survey form and accompanying instructions and definitions (see Appendix) was addressed to the president of each institutional unit listed in the survey universe or, in more than one-half of the States, to a State coordinator who supplied the data from information submitted by the institutional units or coordinated the data collection with all or selected institutional units in the State. Followup letters and phone calls were made to State coordinators or institutional officials who had not reported the data within a reasonable period of time after the due date of August 15, 1977.

Data Verification

Three methods were utilized to verify the reasonableness of data submitted by each institutional unit:

1. A computer check providing a field-by-field comparison with the data submitted for the previous year was made to determine whether the data varied by more than a predetermined percentage from the previous year's submission. The acceptable differences were based on the order of magnitude of the data field sizes: the greater the number of degrees, the lower the percentage of difference permitted.

2. Survey forms containing data items rejected by the computer check were examined visually by survey personnel to determine whether footnotes, explanatory notes, or readily recognizable human errors accounted for the apparent discrepancies. Where necessary, catalogs of the institutions were consulted for institutional offerings.

3. Finally, the remaining discrepancies were resolved by correspondence or telephone contact with State coordinators and institutional representatives

*U.S. Department of Health, Education, and Welfare, Office of Education, National Center for Education Statistics. *A Taxonomy of Instructional Programs in Higher Education,* by Robert A. Huff and Marjorie O. Chandler, OE50064-70. Washington, D.C.: U.S. Government Printing Office, 1970.

Internal checks for consistency included the checking of accumulated totals against subtotals obtained from appropriate subsets of the data.

Data Imputation

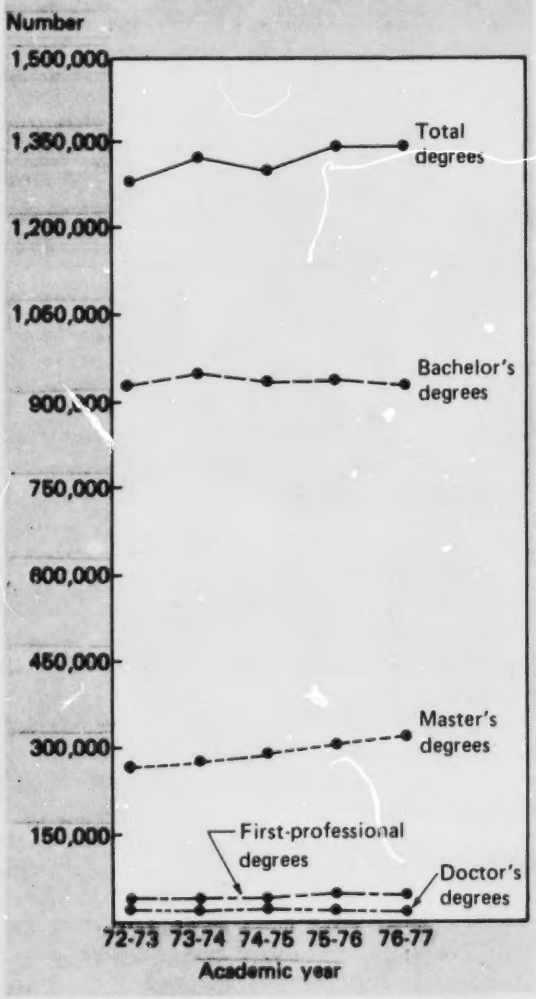
Degree data for two institutional units had to be imputed. The total number of degrees awarded by the two "other 4-year" units was imputed from the data received in *Opening Fall Enrollment, Fall 1976.* The distribution of degrees by field was imputed from this total and from the distribution of degrees awarded in 1975-76 by the institutional units. Only 247 first-professional degrees, 275 master's degrees, and 2 bachelor's degrees, for a total of 524 degrees, were involved. This was 0.004 percent of all degrees awarded in the nation.

Current Data And Recent Trends

This section of the report focuses on some of the areas of change as well as some of the areas of stability with reference to the number of earned degrees conferred by institutions of higher education in the aggregate United States in the academic year 1976-77.

The total number of bachelor's, first-professional, master's, and doctor's degrees conferred by institutions of higher education in the aggregate United States in 1976-77 (1,344,493) showed a negligible decline over the previous year's total of 1,344,581 — a decrease of only 88 students. The net effect of a decrease in men was largely balanced by an increase in women receiving degrees (see tables 1 and B). Table 1 also shows the number and percent change in these degrees conferred, by level of degree and sex of recipient, for each academic year from 1972-73 through 1976-77. The total number of these degrees increased each year, except for: (1) the decline of 0.4 percent in 1974-75 and (2) the decline of less than 0.01 percent in 1976-77. These net declines were always the result of a decrease in men, only partially counterbalanced by an increase in women. Chart 1 shows the number of degrees conferred from 1972-73 through 1976-77 by level of degree.

Chart 1.--Number of degrees conferred, by level of degree, 1972-73 to 1976-77



Considering the percent changes, by level of degree and by sex from 1975-76 to 1976-77 (see tables 1 and B), it can be seen that women showed increases at all levels, the largest (23.0 percent) for first-professional degrees. There were declines in all levels for men except at the master's degree level which showed a 0.3 percent increase.

Nearly 600,000 women were awarded degrees in 1976-77. This represents a 13.5 percent increase over the number awarded in 1972-73. The number of degrees awarded to men declined by almost one percent for the same period of time. The largest increase in the number of degrees awarded to women since 1972-73 occurred for the first-professional degrees, which increased by 235.7 percent (see table 1 and chart 2).

Table B.--Percent change in number of degrees conferred by institutions of higher education, by sex of recipient and level of degree: Aggregate United States, from 1975-76 to 1976-77

Level of degree	Percent change in number of degrees conferred, 1975-76 to 1976-77		
	Total	Men	Women
All levels	(*)	-1.4	1.8
Bachelor's	-0.7	-1.9	0.8
First-professional	2.7	-1.0	23.0
Master's	1.7	0.3	3.3
Doctor's	-2.4	-4.3	3.7

*Less than 0.01 percent.

However, even though women had higher rates of increase at all levels of degrees than men, they were still only approaching parity with men at the bachelor's and master's levels, and were still lagging behind men in the number and percent of degrees awarded at the first-professional and doctor's levels (see tables 1 and C and chart 3). More than four times as many men received first-professional degrees as women, and more than three times as many men received doctor's degrees, as women, in 1976-77.

Table C.--Percent of degrees conferred within each level of degree, by sex of recipient and level of degree, 1975-76 and 1976-77

Level of degree	Percent within each level			
	1975-76		1976-77	
	Men	Women	Men	Women
All levels	56	44	55	45
Bachelor's	54	46	54	46
First-professional	84	16	81	19
Master's	54	46	53	47
Doctor's	77	23	76	24

Chart 2.–Percent change in number of degrees conferred, by sex of recipient and level of degree, from 1972-73 to 1976-77

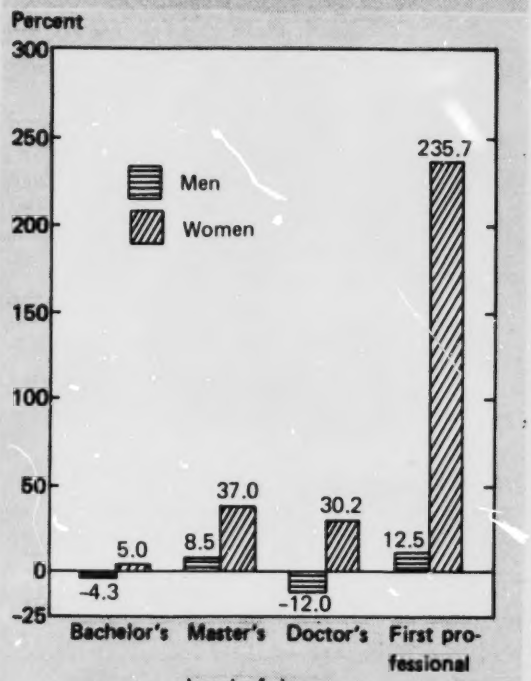


Chart 3.–Percentage of degrees conferred, by sex of recipient and level of degree, 1976-77

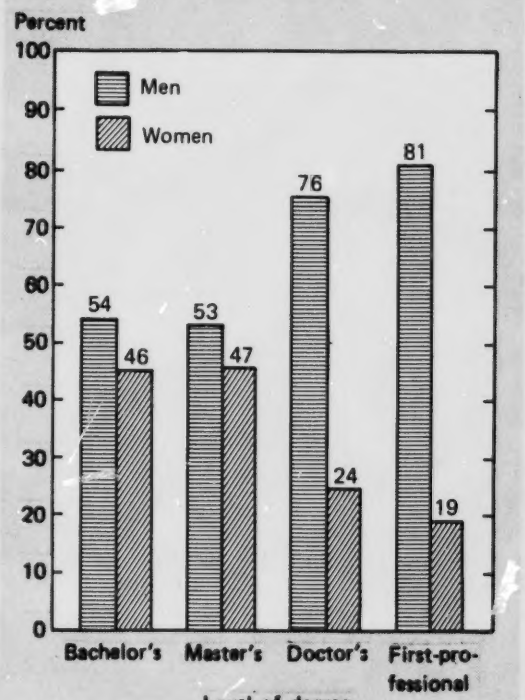

The numbers of degrees conferred in 1976-77, by level of degree and sex of recipient, and by control and level of institution, are shown in table 2. Comparison of the 1976-77 data with those of the previous year shows that the percent of degrees conferred at each individual level by *publicly* controlled institutional units, (see table D) remained the same. The decline for "all levels" is due to rounding.

Table D.–Percent of degrees conferred by *publicly* controlled institutional units, by level of degree, 1975-76 and 1976-77

Level of degree	Percent within each level	
	1975-76	1976-77
All levels	67	66
Bachelor's	69	69
First-professional	41	41
Master's	66	66
Doctor's	64	64

The States with the highest number of bachelor's and higher degrees conferred by *publicly* controlled institutions of higher education in 1976-77 were California (84,247), New York (58,480), and Texas (57,045) (see table 3A). The States with the highest number of bachelor's and higher degrees conferred by *privately* controlled institutions of higher education in 1976-77 were New York (75,117), California (41,257), Massachusetts (40,445), and Pennsylvania (34,487) (see table 3B). When the number of such degrees conferred by *privately* controlled institutions is considered as a percentage of the total number of such degrees awarded, public and private combined, the range is from 0 percent (Alaska, Wyoming, Canal Zone, Guam, and Virgin Islands) to highs of 94 percent (District of Columbia), 70 percent (Massachusetts), 56 percent (New York), and 49 percent (Vermont) (see table E).

The three discipline divisions with the largest numbers of bachelor's degrees conferred in 1976-77 remained unchanged, except that business and management replaced education in first place; social sciences remained third.

Table E.--Percent of total number of bachelor's, first-professional, master's and doctor's degrees conferred by *privately* controlled institutional units, by State or other area, 1976-77

State or other area	Percent

Table F.--Number and percent of bachelor's degrees conferred in the three largest discipline divisions, 1975-76 and 1976-77

Discipline division	Bachelor's degrees awarded			
	Number		Percent of all bachelor's degrees	
	1975-76	1976-77	1975-76	1976-77
Business and management	145,035	153,762	16	17
Education	156,528	145,398	17	16
Social sciences	127,936	118,322	14	13

Table G.--Number and percent of master's degrees conferred in the three largest discipline divisions, 1975-76 and 1976-77

Discipline division	Master's degrees awarded			
	Number		Percent of all master's degrees	
	1975-76	1976-77	1975-76	1976-77
Education	128,410	126,730	41	40
Business and management	42,728	46,650	14	15
Public affairs and services	17,333	19,696	6	16

As in the previous year, the three discipline divisions with the largest numbers of master's degrees conferred in 1976-77 were education, business and management, and public affairs and services (see tables G and 4).

The largest numbers of doctor's degrees awarded in academic year 1976-77 were conferred in education, social sciences, and biological sciences (see tables H and 4). Physical sciences, one of the top three in 1975-76, was replaced by biological sciences in 1976-77.

Table H.–Number and percent of doctor's degrees conferred in the four largest discipline divisions, 1975-76 and 1976-77

Discipline division	Doctor's degrees awarded			
	Number		Percent of all doctor's degrees	
	1975-76	1976-77	1975-76	1976-77
Education	7,769	7,955	23	24
Social sciences	4,160	3,784	12	11

Physical sciences	3,433	3,344	10	10

A more detailed presentation of bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of recipient, for academic year 1976-77, is shown in table 5, wherein the data are given for each discipline specialty as well as each discipline division, by control of institution.

Information is presented for each discipline specialty for first-professional degrees, by sex of recipient and control of institution, for 1976-77, in table 6.

As noted earlier, the most dramatic increase over the previous year in degrees awarded by institutions of higher education occurred at the first-professional level, for women. Table I shows the number of such degrees conferred in 1976-77 by sex and the percent changes over 1975-76. The only specialty in which women did not increase in number was that of chiropractic, which showed a decrease of 21 percent compared with the previous year. Men showed a decrease in five specialties: (1) dentistry (-8 percent); (2) medicine (-3 percent); (3) optometry (-6 percent); (4) veterinary medicine (-2 percent); and (5) chiropractic (-12 percent).

Table I.–Number and percent change of first-professional degrees conferred by institutions of higher education, by sex of recipient and discipline specialty: Aggregate United States, 1975-76 and 1976-77

Discipline specialty	First-professional degrees awarded			
	Number in 1976-77		Percent change 1975-76 to 1976-77

*Includes "Other" category.

The number of intermediate degrees conferred by institutions of higher education is shown in table 11, by type of award and control and level of institution.

Ten-Year Summary 1966-67 — 1976-77

Bachelor's and Higher Degrees

The number of women awarded bachelor's and higher degrees doubled from 1966-67 (296,732) to 1976-77 (599,344), while the number of men who received these degrees increased 56 percent (from 476,643 to 745,149) (see table J). The percent of such degrees awarded to women increased from approximately one-third (38.4 percent) in 1966-67 to almost one-half (44.6 percent) in 1976-77. See table K for annual changes in the number and percent of bachelor's and higher degrees over these years.

Bachelor's Degrees

The number of women, who received bachelor's degrees, increased 80 percent from 1966-67 (238,133) to 1976-77 (429,107), while the number of men who received bachelor's degrees increased 54 percent (from 324,236 to 499,121) (see table L). The percent of such degrees awarded to women increased from 42.3 percent in 1966-67 to almost one-half (46.2 percent) in 1976-77. See table M for annual changes in the number and percent of bachelor's degrees over these years.

Table J.–Number and percent of bachelor's and higher degrees conferred by institutions of higher education, by sex: Aggregate United States, 1966-67 to 1976-77

Master's Degrees

The number of women awarded master's degrees in 1976-77 (150,031), was almost three times the number awarded in 1966-67 (54,713), while the number of men awarded master's degrees in 1976-77 (168,210), was about two-thirds greater than in 1966-67 (103,179) (see table N). The percent of such degrees awarded to women increased from 34.7 percent in 1966-67 to 47.1 percent in 1976-77. See table O for annual changes in the number and percent of master's degrees over these years.

Doctor's Degrees

The number of women who received doctor's degrees in 1976-77 (8,094) was more than three times the number who received such degrees in 1966-67 (2,457), while the number of men who received doctor's degrees in 1976-77 (25,150) was approximately one-third greater than in 1966-67 (18,164) (see table P). The percent of doctor's degrees awarded to women increased from 11.9 percent in 1966-67 to 24.3 percent in 1976-77 — more than doubling in this period of time. See table Q for annual changes in the number and percent of doctor's degrees over these years.

Table N.–Number and percent of master's degrees conferred by institutions of higher education, by sex: Aggregate United States, 1966-67 to 1976-77

Academic year	Total	Men		Women	
		Number	Percent	Number	Percent
1966-67	157,892	103,179	65.3	54,713	34.7

First-Professional Degrees

The number of women awarded first-professional degrees in 1976-77 (12,112) increased 848 percent over the number awarded such degrees in 1966-67 (1,429), while the number of men awarded these degrees in 1976-77 (52,668) increased only 70 percent over the number in 1966-67 (31,064) (see table R). The percent of first-professional degrees awarded to women more than quadrupled from 4.4 percent in 1966-67 to 18.7 percent in 1976-77. See table S for annual changes in the number and percent of first-professional degrees over these years.

Table R.–Number and percent of first-professional degrees conferred by institutions of higher education, by sex: Aggregate United States, 1966-67 to 1976-77

Detailed Tables

The eleven detailed tables in this report for 1976-77 contain what the authors believe to be the most comprehensive and useful groupings of the data within the constraints of publication. The tables are comparable to, and use the formats of, reports of previous years.

Table 1 is a comparison of the number and percent change of degrees conferred, by level of degree,for the five academic years from 1972-73 through 1976-77. Table 2 is a summary of the degrees conferred in 1976-77, by sex and level of degree, as well as by control and level of institution. Tables 3, 3A, and 3B show State data for each of the degree levels, by sex of student and by control of institution. Table 4 presents bachelor's, master's, and doctor's degrees awarded, by sex and by discipline divisions. Table 5 shows bachelor's, master's, and doctor's degrees awarded, by sex and by discipline specialty within each discipline division. Table 6 presents data on first-professional degrees conferred in twelve discipline specialties, by sex and control of institution.

Tables 7, 7A, and 7B present data on the number and percent change of bachelor's degrees conferred for the five academic years from 1972-73 through 1976-77, by sex, by discipline division, and by control of institution. Tables 8, 8A, and 8B do the same for master's degrees, and tables 9, 9A and 9B do the same for doctor's degrees. Tables 10, 10A, and 10B show data on the number and percent change of first-professional degrees conferred for the five academic years 1972-73 through 1976-77, by sex, by discipline specialty, and by control of institution. Table 11 summarizes intermediate degrees conferred in 1976-77, by control and level of institution.

Additional Information

Additional information from this survey of earned degrees, 1976-77, is available in five forms:

(1) A copy of the computer tape containing the data for this survey may be purchased for $94.00 per reel on 9-track 1600 BPI. This file is a one-reel file. Tapes come with standard IBM label and odd parity in EBCDIC. The above specifications can be modified to meet individual user capabilities. The cost for different specifications is $120.00 per reel. The necessary documentation accompanies each tape delivery.

(2) The data on the computer tape mentioned above also are incorporated into the EDSTAT online educational information access system operated by NCES. This system, which can be entered through modestly priced keyboard terminals anywhere in the United States, permits comparison of earned degrees for academic year 1976-77 with those for previous years, as well as relating them to data on finance, enrollment, and other institutional characteristics.

(3) Computer printouts are available listing selected earned degree items for individual institutions or groups of institutions; other special tabulations can be prepared on order. Users are charged at cost for printouts and special tabulations.

(4) These data also may be purchased in microfiche form, for the actual cost of the microfiche (between $5.00 and $15.00, depending on the number of microfiche).

Inquiries for tapes, online access, computer printouts and microfiche should be addressed to:

Data Systems Branch

Room 3033
400 Maryland Avenue, SW.
Washington, D.C. 20202
Telephone: Area Code 202-245-8760

(5) In addition to the collection of the number of earned degrees conferred, by institution, level of degree, discipline division, discipline specialty, and sex, data also were gathered on the racial/ethnic categories of degree recipients. The racial/ethnic data are not included in this summary. They are presented in a report focused on the racial/ethnic characteristics of the earned degree recipients, by institution, that is available from the Office of Public Affairs of the Office for Civil Rights, U.S. Department of Health, Education, and Welfare, 330 Independence Avenue, SW., Washington, D.C. 20201. The telephone number is (202) 245-7504. The racial/ethnic data are included on the computer tape, EDSTAT online system, and computer printouts described above.

Detailed Tables

TABLE 1.--BACHELOR'S AND HIGHER DEGREES CONFERRED IN INSTITUTIONS OF HIGHER EDUCATION 1/, BY LEVEL OF DEGREE AND SEX OF STUDENT: AGGREGATE UNITED STATES, 1972-73 TO 1976-77 2/

LEVEL OF DEGREE AND SEX OF STUDENT	1972-73	1973-74		1974-75		1975-76		1976-77		PERCENT CHANGE, 1972-73 TO 1976-77
	NUMBER	NUMBER	PERCENT CHANGE FROM 1972-73	NUMBER	PERCENT CHANGE FROM 1973-74	NUMBER	PERCENT CHANGE FROM 1974-75	NUMBER	PERCENT CHANGE FROM 1975-76

1/ AN INTERMEDIATE DEGREE IS ANY RECOGNITION (DEGREE OR CERTIFICATE) FOR A PROGRAM INTERMEDIATE BETWEEN THE MASTER'S DEGREE AND THE DOCTOR'S DEGREE (PH.D., ED.D., ETC.), WHICH IN ESSENCE IS THE DOCTOR'S DEGREE WITHOUT THE DISSERTATION. FOR EXAMPLE, MASTER OF PHILOSOPHY, CANDIDATE IN PHILOSOPHY, DOCTOR OF ARTS, ETC.

Appendix

Reproduction of Survey Form Instructions, Parts A and B

INSTITUTION	1. INSTITUTION CODE NUMBER

INSTRUCTIONS FOR PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS, 1976-77

Only the 10 professions listed below should be reported in Part A. Within these professions, report **first-professional** degrees only. A first-professional degree is defined herein as one which meets all three of the following criteria:

(1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance; and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work-plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are first-professional degrees within the 10 professions other than those specifically named in connection with those professions.

For each of the 10 disciplines, degrees other than first-professional are to be reported in Part B.

The TOTAL line (line 14) should show the sums of the entries in each discipline in columns 4 and 5.

PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS *(Requiring at least six years of study)*

(Detailed portions of Part A have been deleted and only discipline specialties and respective codes are shown here.)

1204	Dentistry
1206	Medicine
1209-1	Optometry
1210	Osteopathic medicine
1211-1	Pharmacy
1216-1	Podiatry
1218	Veterinary medicine
1221-1	Chiropractic
1401-1	Law, general
2301-1	Theological professions, general
9799	Other

NCES FORM 2300-2.1, 3/77

INSTRUCTIONS FOR PART B: BACHELOR'S, MASTER'S, AND DOCTOR'S DEGREES

1. **TYPES OF DEGREES.** Report earned bachelor's, master's, and doctor's degrees, except for those first-professional degrees reported in Part A. Report certificates and diplomas if they are equivalent to a bachelor's degree and if they are based on at least 4 years of college work.

Do **not** report honorary degrees.

Certificates for work between the master's degree and the doctor's degree should be separately listed at the end of Part B. See 5(d) below.

(Report Associate in Arts degrees or similar awards below the bachelor's level in Part C.)

2. **GROUPING OF DISCIPLINES.** The major fields of study to be reported here fall in the following discipline divisions:

0100 Agriculture and Natural Resources
0200 Architecture and Environmental Design
0300 Area Studies
0400 Biological Sciences
0500 Business and Management
0600 Communications
0700 Computer and Information Sciences
0800 Education
0900 Engineering
1000 Fine and Applied Arts
1100 Foreign Languages
1200 Health Professions
1300 Home Economics
1400 Law
1500 Letters
1600 Library Science
1700 Mathematics
1800 Military Sciences
1900 Physical Sciences
2000 Psychology
2100 Public Affairs and Services
2200 Social Sciences
2300 Theology
4900 Interdisciplinary Studies

3. **SKIPPING INAPPLICABLE DISCIPLINES.** Skip those discipline divisions for which your institution does not grant degrees. Please indicate by circling the appropriate page number in the "contents" the discipline divisions in which your institution awarded degrees.

4. **NUMBER OF DEGREES.** Report all degrees (within the limitations of paragraph 1, above). If a student earned two degrees between July 1, 1976 and June 30, 1977 *(e.g.,* a bachelor's degree at the end of the summer session and a master's degree at the end of the following academic year), report each of the two degrees in its appropriate classification.

5. **DEGREE LEVELS.**

(a) Report all BACHELOR'S DEGREES requiring at least 4 but not more than 5 years of academic work in Columns (4) and (5) of the report-form. Also, report ALL bachelor's degrees conferred in a COOPERATIVE or WORK-STUDY PLAN or PROGRAM in Columns (4) and (5). A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with his college studies.

(b) MASTER'S DEGREES. The master's degree in liberal arts and sciences is the degree customarily granted upon successful completion of one *(sometimes two)* academic years of work beyond the bachelor's degree.

Except for the Master of Divinity degree (Part A), report all master's degrees in Part B, Columns (6) and (7) *(even though the master's is required in some fields, such as Library Science, Hospital Administration, and Social Work, for employment at the professional level, and even though, as in the case of Social Work, 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion.)* Report Education specialist (6-year degree) in same columns as master's degrees, in appropriate discipline specialty in Education (0800).

(c) DOCTORATE. The doctorate classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. *(In the case of the Doctor of Public Health, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.)* Please report the doctor's degrees *(except those included in Part A)* in Columns (8) and (9) of the report-form.

(d) OTHER DEGREE OR CERTIFICATE. If your institution provides any recognition *(degree or certificate)* for a program intermediate between the master's degree and the doctor's degree *(Ph.D., Ed.D., etc.)* which in essence is the doctor's degree without the dissertation *(for example, Master of Philosophy, Candidate-in Philosophy, etc.) (do not include 6-year specialist degrees)*, please report the name of the degree or certificate and the number of students receiving it in the item at the end of Part B *(after Item No. 9800). (Do not include in the tabulated figures for Bachelor's, Master's, and Doctor's degrees in the report-form.)*

6. **CLASSIFICATION OF DEGREES ACCORDING TO MAJOR FIELD OF STUDY**

(a) Specific Classification. Classify degrees as specifically as the list of specialties in the broad discipline divisions of the report form permits. Thus, report a bachelor's degree in business administration with an accounting major in Accounting (0502), NOT in Business and commerce, general (0501).

(b) Degree of Doctor of Philosophy. Classify the Doctor of Philosophy degree according to the student's major field of study. Thus, a Ph.D. in Chemistry should be reported as a degree in Chemistry, NOT as one in Philosophy.

(c) Majors of Students Prepared to Teach. The general rule is to classify degrees according to the major area of specialization. This means, in general, that degrees of students who have prepared to teach an academic subject, such as English, biology, or foreign languages, should be reported respectively in Letters, Biological Sciences, and Foreign Languages and NOT in Education. On the other hand, the degrees of students who have prepared to teach such special subjects as agriculture, art, music, etc. should be reported in Agricultural education (0899-1, Art education (0831), and Music education (0832).

(d) Split major. When a student graduates with a split major, report the degree in the area of greater specialization, if possible. If this is not possible, the degree should be reported in the discipline specialty closest to the combination. If a split major involves two languages, report it in 1101, Foreign languages, general. Similarly, within each of the other discipline divisions, if a split major involves two specialties within a division, the degree should be reported under the appropriate "general" specialty indicated under that discipline heading. For example, a major in history and political science should be reported under 2201, Social sciences, general. If the split major covers more than one discipline division, the degree should be reported in the area of greater specialization. DO NOT REPORT FRACTIONS OF A DEGREE.

(e) Double majors. When a student graduates with a major in two discipline specialities, report the degree in the field in which the degree was awarded. If the student received two degrees, report only one—in the field of greater specialization, if possible.

(f) Unlisted Fields of Study. When classifying a specialty which does not seem to fit into the list, the institution has two choices: (a) the specialty can be listed by name under "other" if it represents an

unlisted specialty, or (2) it can be placed in a "general" category if it covers several listed specialities. Do NOT erase or change any titles of discipline specialties.

Discipline specialties are coded by number. Keypunching is done according to code number and any manual name change would result in improper coding.

(g) General Majors. The term general major is used to designate diversified curriculums within an area of study. Ordinarily, degrees based on a general major should be reported in one of the general categories of the report-form, such as Physical sciences, general (1901); Social sicences, general (2201); Humanities and social sciences (4903), etc. Thus a degree based on concentration in History-Government-Economics should be reported in Social sciences, general.

(h) Interdisciplinary Studies. The code in the 4900 group are for reporting fields of study which represent two or more broad discipline divisions; for example, Mass Communications, encompassing segments of psychology, education, business, journalism, social sciences, fine arts, etc., should be reported there. Specify the name of the interdisciplinary study when reporting in 4999.

(i) Before submission, please verify that the specialty subtotals (for examples, lines 22, 33, and 52, etc.) are the sum of the specified preceding lines for every column (colums (4) through (9).

(j) No data should be entered in gray areas, such as that for code number 0899 on page 22.
